# COOKING WEBSITE

## INTRODUCTION

This cooking website has been designed to give the user as much freedom as possible in recipe input, but the ability to find what you want quickly is something you will never find in a cookbook. The users can locate recipes based on almost any criteria we can imagine. The cooking website is to create a recipe which acts as a meal management software 'book' that allows you to access an unlimited number of recipes, add your own recipes, share recipes.

# AIM AND GOALS OF THE WEBSITE

The main aim is to bring joy and delight in the field of recipes and cooking. To achieve this goal, we aim to empower viewers to make informed about different taste and culture of the delicious food items with our expert reviews, detailed specifications and procedure.

## VISION OF THE WEBSITE

The vision of this project is to **‘let the world know about different continental food’**. By this project viewer will get an easy idea about how we follow the procedure of making delicious food items in our kitchen.

# Abstract

Today, there are a lot of recipes or cookbooks out there. There are a lot of recipe software applications and, literally, thousands of websites have recipes for everything.

Though there is now more recipe or food or kitchen information available than ever, most of it is stuck in the trappings of the old fashioned cookbook where the user still have to flip paper pages, cannot combine multiple recipes into one meal and, unless the user have a very good memory, can seldom remember which book had what recipe the user might want.

As the days go by, we tend to choose meals on the spur of the method, often based on what is easy or available. Our pages make it easier to find recipe and have a nutritional plan so as to maintain good health.

# COMPONENTS

## A. Add recipe function

Add recipe appears as a dropdown list with 3 categories as: veg, non-veg & home remedies.

The user is allowed to upload his own recipes in these categories. After the user selects a category he is given with the form which includes the following:

1. Name of the dish
2. Serves for how many people
3. Time taken for preparation of that recipe
4. Any prerequisites to be followed before we start preparation
5. Ingredients needed
6. Cooking procedure which includes detailed description about preparation
7. Upload an image or video which gives clear picture or view of the food to be prepared quickly.

## **B. Manage recipe**

After the user uploads a recipe he can view his recipe under the category named manage recipe where in the user is allowed to modify his own uploaded recipe if necessary or he can also delete his recipe.

## **C. Rate recipe**

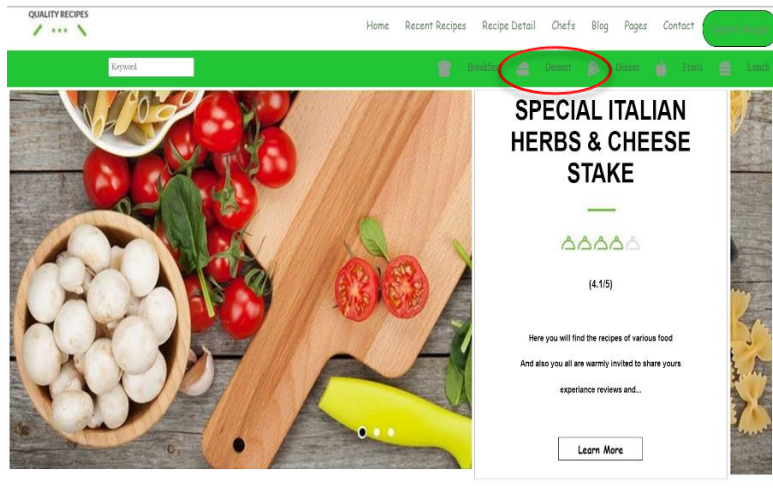

Users are allowed to rate the viewed recipes if interested.

# ROLE AND RESPONSIBILITY OF GROUP MEMBERS

S.NO.	GROUP MEMBER	REGISTRATION NO.	ROLL NO.	ROLE
1.	JEETANSHU SRIVASTAV	11904972	28	DESIGN LOGO, TITLE, CREATE LINKS FOR FOOD INFO. AND THEIR RECIPE.
2.	SUMAN KUMAR SAH	11905031	29	DESIGN COLORING OF THE WEBSITE AND CREATE MIDDLE BODY LINKS IN THE WEBSITE.
3.	SACHIN BHAGCHANDANI	11905035	30	DESIGN BACKGROUND, CREATE FEW LINKS SUCH AS ABOUT US, FAQ'S AND SOME MORE.

# WORKING OF THE WEBSITE

a.

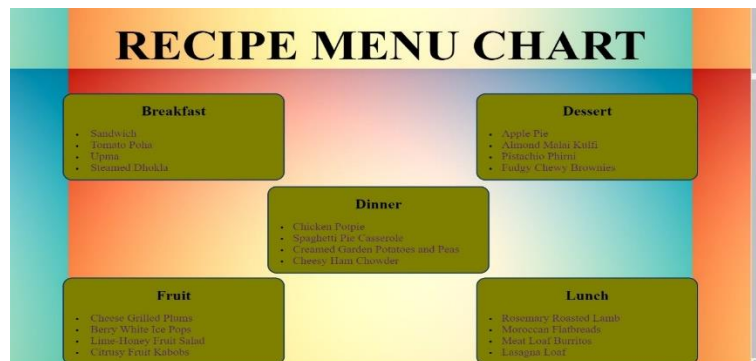

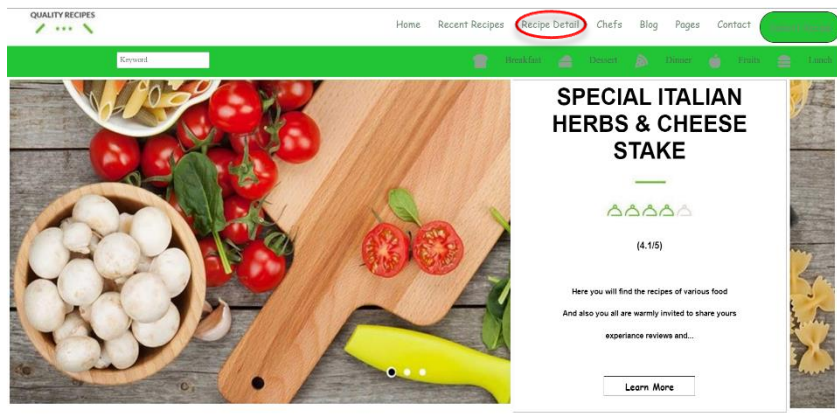

## Dessert

1. Apple Pie
2. Almond Malai Kufi

## **HTML TAGS THAT ARE USED**

- Paragraph tag
- Main heading tag
- Hyperlink tag
- Listing items tag
- Bulleted list tag
- Numbered list tag
- Table tag
- Horizontal line tag
- Image tag

# **SWOT ANALYSIS**

We propose the recipe management system as a web application on any OS. Recipe Management System allows the user to upload a recipe, images, videos and also rate recipes. The uploaded recipe will be approved by an expert chef within a day and then it will be made available to the users. In future, we can add a feature where we can provide a diet chart based on the user's weight, height and gender.

**THANK YOU!!!**
